Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 May 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S.

Patent No. 5,802,975 to Prem et al.

With respect to claim 1, Prem et al. teaches a printing machine including a print cylinder, 22, provided with radial holes for emitting compressed air in order to allow the introduction and removal of a print sleeve, 24, carrying a print cliché, characterized in that said print cylinder consists of a fixed shaft on which there is slidably mounted a mobile cylinder carrying said print sleeve, in that the print cylinder is supported at one end by releasable support means suitable to allow the axial movement of said mobile cylinder, and in that it includes means for axially moving the mobile cylinder between a retracted work position and an extended sleeve change position in which it projects through the machine side. See column 3, line 43 - column 4, line 9 and Fig. 3 in particular.

With respect to claim 2, Prem et al. teaches that the mobile cylinder is airtightly slidably mounted on the fixed shaft and its axial movement is achieved by means of the same compressed air used to replace the print sleeve. See column 4, lines 26-38 and Figs. 4-6.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Prem et al. in view of U.S. Patent No. 5,241,905 to Guaraldi et al.

With respect to claims 3-4, Prem et al. teaches all that is claimed, as in the above rejection of claims 1-2 except that the releasable support means consist of a dismountable flange with a removable part and of a piston suitable to engage a corresponding seat in the cylinder.

Guaraldi et al. teaches a printing machine having a cylinder with releasable support means consist of a dismountable flange with a removable part and a piston suitable to engage a corresponding seat in the cylinder. See column 4, line 29 - column 5, line 26.

It would have been obvious to one having ordinary skill in the art at the time of the invention to modify the apparatus of Prem et al. to have the support means and piston of Guaraldi et al. in order to more easily remove and replace the cylinder.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent No. 4,823,693 to Kobler, U.S. Patent No. 5,072,504

to Thompson, U.S. Patent No. 5,638,754 to Steinmeier et al., and U.S. Patent No. 6,668,717 to Schneider et al. each teach an apparatus having apparent similarities to the claimed subject matter.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jill E. Culler whose telephone number is (571) 272-2159. The examiner can normally be reached on M-F 10:00-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Nguyen can be reached on (571) 272-2258. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
